

June 10-13th, 2024

HYR-SENSE:

**Hyperspectral & Thermal
Remote Sensing for
Environmental Justice**

**NASA-SBG & NSF-ESIIL
have teamed up to host
you at the University of
Colorado Boulder**

Apply by March 24th

Learn how to utilize imaging spectroscopy and thermal data from satellite and airborne missions & gain technical skills including environmental feature extraction and analysis to enhance environmental justice in your research and community.

All accepted applicants will have their travel, accommodations, and meals cost covered by the program to support their participation.
